ADVISOR:

Prof. LIONG Shie-Yu

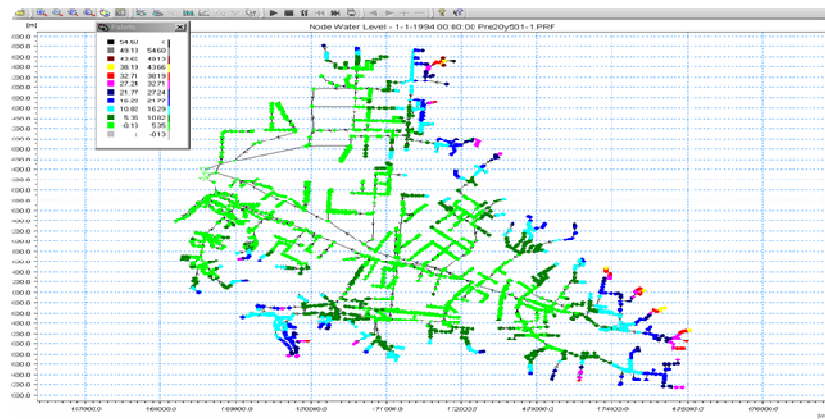

INTRODUCTION

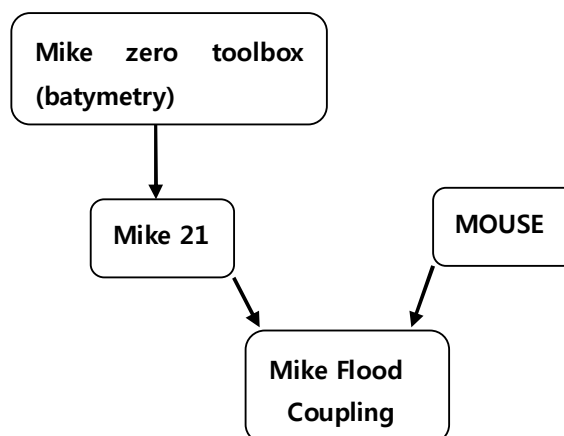

Today the whole day was spent for our teamwork. We tried coupling MIKE 21 and simple MOUSE model using MIKE FLOOD. We faced some problems with MOUSE simulation. The whole day was spent on identifying the problem and correcting the same.

MOUSE

The problems with MOUSE simulation was identified and tried correcting them.

FUTURE PLAN

OUR TOPIC

The presentation topic given to us was “Ideal conditions of pipe culverts in Incheon Gyo catchment”. Prof. Choi gave us some suggestions and ideas regarding our presentation topic . Tomorrow we will be concentrating on our presentation topic and present some possible solutions.
