

Completed

1. Delimitation
2. DEM
3. Know how to operate the software about transform CAD files to GIS files. It's related to "Simplification of the sewer network" and "dividing the catchment".

Q:

1. What's more of data do you need in MIKE/MOUSE?
2. About "Simplification of the sewer network" and "dividing the catchment"
 - 1) simplified to what extent? (this depends on the accuracy of the model needs)
 - 2) or just go with the already provided **7 catchments**, from the already provided CAD data" **small catchment per manhole**"
 - 3) or just go with the already provided CAD data " **5. sewer network map_simple**"
3. About what I've done
I've sent the results to you by EuroAqua. It includes:
 - 1) Delimitation-building, road, contour, manhole_ground level
 - 2) DEM
 - 3) CAD to Geodatabase and Shapefile , which kind of file do you need?

Plus:The“sub-catchment“in Geodatabase and Shapefile
need registration ,or there is sth wrong...

Next

1. What's more data do you need, please tell me~
2. **” Simplification of the sewer network” and ”dividing the catchment”** ,I THINK THIS TWO NEED US TO DISCUSS
3. I'd like to try with SWMM ,MapInfo .it's not bad to have a contrast~
